

## Information About Student Accounts

All student accounts for HMH ThinkCentral (GoMath) and McGraw-Hill ConnectEd (Wonders) have the following format. We are using the “standard” username + rialto. The password is “stu” + the 4 digits from the username (last for digits of the student permanent ID). An example is shown below.

Example:

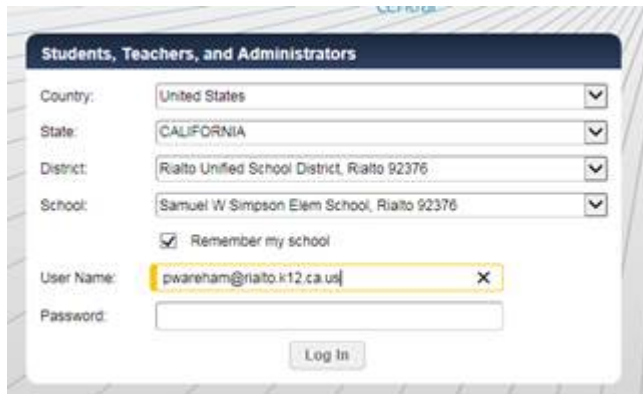

Student Name: Smith, John

Student ID: 123456

Username will be: **johns3456rialto**

Password will be: **stu3456**

For GoMath You need to have all of the values set for: County, State, District, and School.

ALSO, students can paste the username into the box

BUT, they cannot just paste the password using the mouse and paste from the menu (The Log In button will not highlight).

You must either manually type your password

OR

paste it with a CTRL-V

OR

Paste it (using mouse and menu) THEN delete the last character, then type in the last character.
